

GIOCONDA

Desktop Tools for the Railway Industry

Route Assessment Tool

*Using High Definition Footage to help plan
and confirm the location of trackside assets*

GIOCONDA

Desktop Tools for the Railway Industry

Signal Sighting Tool

Using High Definition footage with tracked virtual objects to evaluate sighting issues

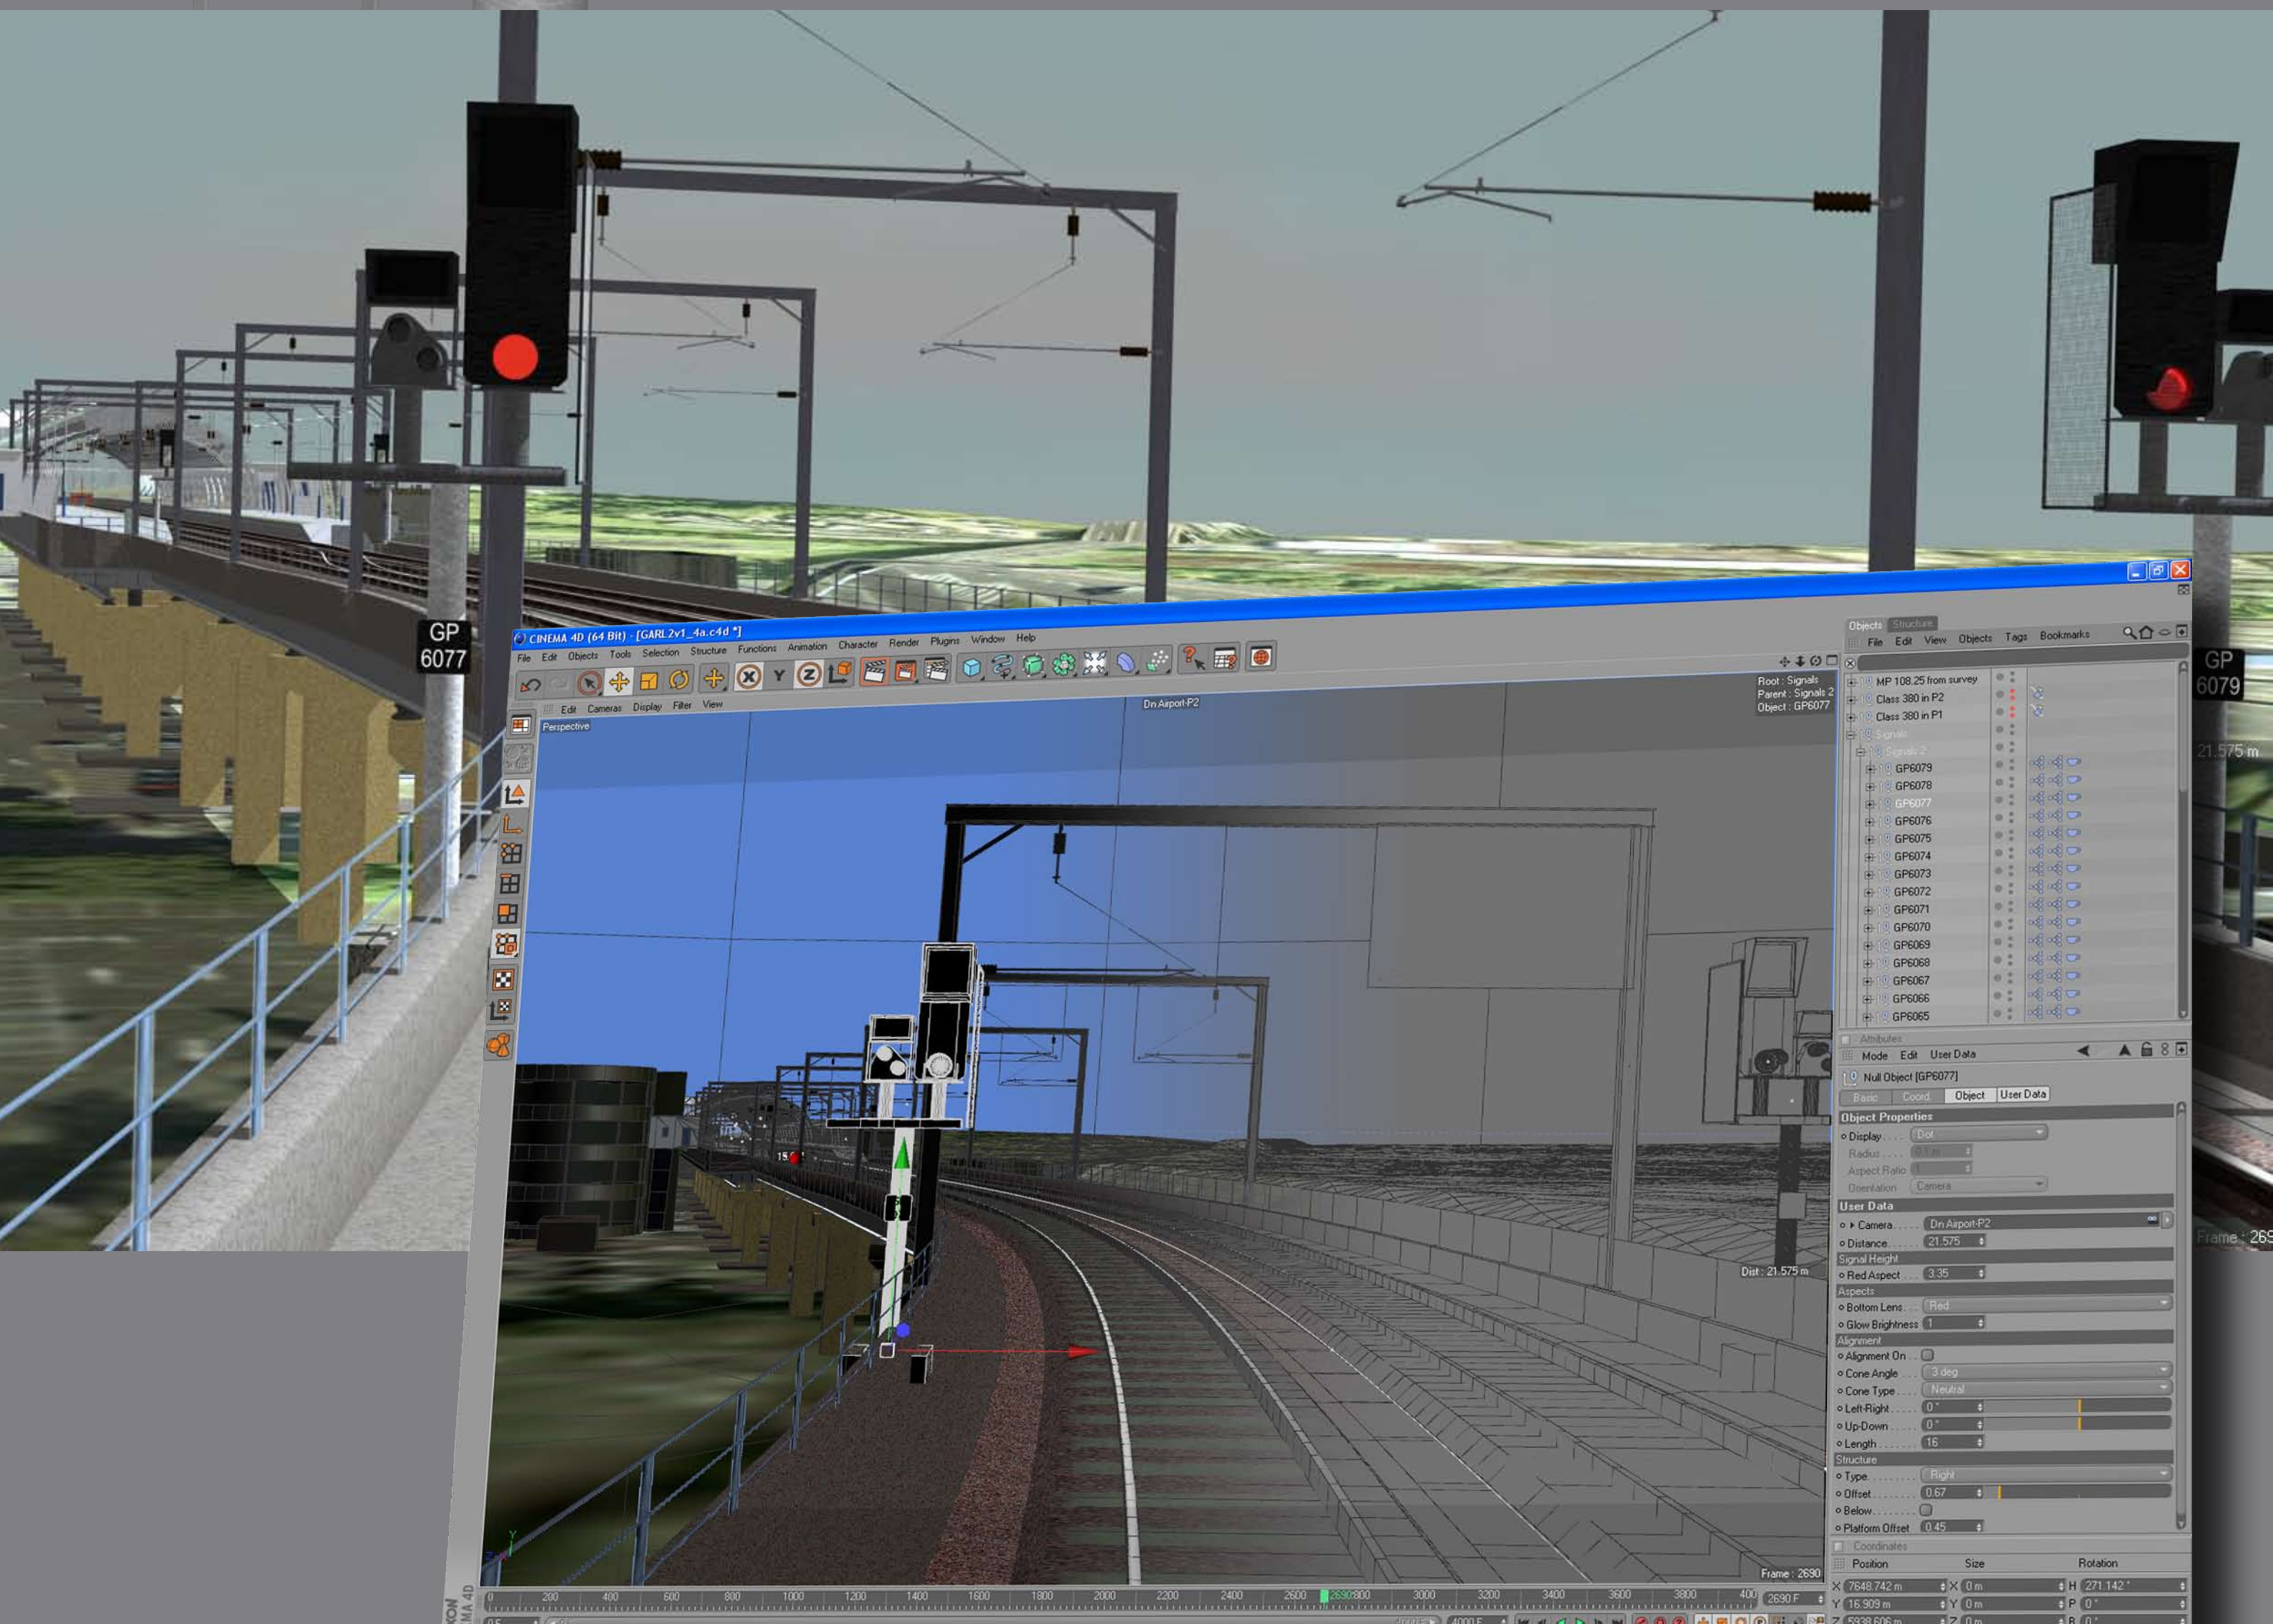

GIOCONDA

Desktop Tools for the Railway Industry

Virtual Sighting Tool

Using full virtual reality modelling to solve construction and sighting issues

GIOCONDA

Desktop Tools for the Railway Industry

**A partnership
providing a total service**

*The core activity of Gioconda is to provide
workable desktop solutions for Railway
Planning and Signal Sighting*

*In association with Track Access Productions
we can supply Driver Route Learner material
as a natural progression from the signal
sighting project*

*We are also working closely with Sydac in
order to progress the work done in planning
through to simulator solutions*
